LANGLEY & CO.,

The Daily Standard.

Monday, January 8, 1872.

The Byptian Article of the Government Organ. Occasionally something new turns up in spite of So'omon's assertion to the contrary. The last new thing appeared yesterday in a local paper; and it was nothing more nor less than going to Expt for a precedent in representative government. Champollion, Wilkinson, and Gliddon might be more astonished at the new use of modern Egyptian history than they were when they hit upon the way to decipher the ancient hierogly. phics on the ruins in the valley of the Nile. But like many far-fetched things, the Egyptian precedent is a silly quota-tion,—and, of course, of no practical account, -and particularly in our politics. As applied to the political situation in this country, it is the veriest twaddle. Possibly, the writer of it purposely in-tended it to be such, in order to render the position of the present Ministry still more ridiculous than it has already become: That is the only charitable conclusion at which we can arrive; and if we are mistaken in that, we can only con-clade that the writer has become demented. The object of the Egyptian MOLASSES, article may be to prove that the Mc-Creight Cabinet is as imperishable as Cheops,—and that any opposition to the Cabinet itself or its measures will be punished with the bastinado, -in other words, that in case of opposition, the As- Lowe, Stahlschmidt & Co. sembly will be prorogued, the members told to go home, and the salaries of the seventy odd officials be paid with monthly regularity, in accordance with the provisions of the Civil List Act, in spite of the well understood wishes of the people. It might be that the bastinado is intended as a threat of dissolution. But all such articles and all such subterfuges as they contain or imply are sheer nonsense. The truth of the matter is, we cannot blink the fact that we have started R spansible Government; and as a necessary and inevitable consequence, there will be Government party and an Opposition. Next, that the present Ministry was organized without consulting the representatives of the country. It was started in a stealthy, hap-hez and manuer, trusting to chance to perpetuate its existence; and if it should be turned out, when the Assembly shall have met, the defeat of the Ministry may be taken as the deliberately expressed opinion of the country. Now will any one presume to deny the right of a majority of the Assembly to defeat the present Ministry? No one dare deny their right to do so, on any constitutional ground known in any representative country out of Egypt. It follows, then, as a natural consequence, that whether the Ministry meets the Assembly late or early, and is then defeated, there must be some delay before the succeeding Ministry would be preneed to attend to the public busi Of the consequences of that delay, the majority who may turn out the present Ministry will be the best judges. The majority will represent the country; and whatever its conclusion may be, it must be accepted and enforced as the well-understood wishes of the people. We are now presumed to have a constitution that enables the people to make their own Government. If through their representatives they should say that the present Government does not possess their confidence, they have a clear and unquestionable right to make a different Ministry from the one now in power. Moreover, a Government in whom the people have confidence, is the very first consideration. The majority of the consideration. The majority of the people must have confidence in their rulers—and if it took till next summer to attain that end, it would be the first great vicor in self-government in this country.

Our whole system of Government is thearitically bassed on the confidence of the majority, and here it must be practically carried out,—all the attempts to hoodwink the people by Egyptian similies to the contrary notwithstanding. But what makes the attempt to scare members by the cry of delaying the business of the country still more senseless, is the fact, that the same kind of argument may be seed in the session of 1873-4 or 5, and and infinitum. If the Ministry meet not be defeated in 1571 for fear of delay, it ought not be defeated in '73-4, or 5, for fear of a similar result. In that case the present Ministry would be as imperishable as the Egyptian Cheops. Not even a general election could turn them out so long as they, the Ministers. represented constituencies. The delay ery is too absurd to be credited to any but one who draws precedents from Egyptian politics. Wnether t be the men or the measures that are objected to, "delay" might be arged as a reason for keeping the Ministry in power, and if such a paltry reason were to triumph, there would be an end put at once and forever to our

boasted system of Responsible Govern-CERISTMAS CHEER.—We would recommend those of our readers who have not already chosen their roast beef for Christmas Day, to visit the store of Messrs.
